Pedagogical Solution

A pedagogy plan is a yearly plan for teachers and schools for a complete year. The main aim of the pedagogical plan is to make the teaching and learning process more constructive, collaborative, integrative, reflective and inquiry-based. The school has a protocol that is followed, we have a “vision” and a “motto” too, but the pedagogical solution makes it easy to achieve by giving a path. We find the revised depth to look at the curriculum, where we could focus to make the learner achieving the learning goal by doing. It gives a broader spectrum to the teacher, who is more a mentor, to use real-world examples to explain the situation. It gives a collaborative view to all the subjects by integrating activities in different subjects. It promotes aesthetic sensibility and experiential learning and at the same time, teachers are very much prepared with different resources. The plan makes it easy to make a student have holistically developed.

Our pedagogical plan tries to cover all the attributes:

In-service teacher training topics and scheduled.

Strength and growth come only through continuous efforts and persistent hard work, be it personal progression or the professional growth, and the best way to excel and grow, is to share.

**Service Training Programmes for teachers, to mend,
bend and polish their teaching method

21st Century Skills:

There is an increased awareness among the educators of the need to integrate what are called as 21st Century skills in educational systems.

There are three key 21st century skills i.e. Learning Skills, Literacy Skills and Life Skills.

Learning skills include:

- Critical Thinking
- Creativity
- Communication
- Collaboration

Literacy skills include:

- Information literacy
- Media literacy
- Technology literacy

Life skills include:

- Flexibility
- Leadership
- Initiative
- Productivity
- Self-awareness

Schools must focus on enhancing the skills required for a successful adult life in 21st Century. It is important that the students are able to think.

Scientifically, mathematically or artistically to face the real-life challenges in an information and technology driven world and enhance their inherent potential.
